Art Unit: 3748

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-9, 12-15, 19-20, 23, 34-35, 46-52, 55, are rejected under 35 U.S.C. 102(b) as being anticipated by US 4553037 (Veazey).

Veazey discloses a hybrid energy system which can be used both on vehicle platform (figure 6), or on boats (figures 5, 7-18), the energy system uses both solar energy and wind energy by having adjustable solar cell panels 25, or adjustable Darrieus windmill 21 to generate electricity through back-up generator 26 or to store energy in batteries 24.

Claims 1-4, 7, 12-15, 19-20, 46-52, 55, are rejected under 35 U.S.C. 102(b) as being anticipated by US 6396239 (Benn et al).

Benn et al discloses an energy system which can be used on vehicle platform (figure 1) the energy system uses solar energy by having adjustable solar cell panels 10, to generate electricity through back-up generator or to store energy in batteries.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6, 10-11, 16, 21-22, 24, 26, 29, 32-33, 37, 39-41, 43, 46, 53, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4553037 (Veazey). Veazey discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the specific powers, different types of containers, battery box, connector..etc..... However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to elect different types of devices as claimed in Veazey for the purpose of achieving appropriate power output.

Claims 17-18, 22, 25, 27, 28, 30, 31, 36-38, 42, 44, 54, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4553037 (Veazey) in view of US 2003/0054329 (Springett). Veazey discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the communication system having satellite dish. Springett discloses it's well known for a portable power plant on a vehicle platform to have a satellite dish (column 2). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide a satellite dish in Veazey as taught by Springett for the purpose of communicating with other facilities if needed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dauvergne, Holzwarth, Azzam et al, disclose portable power plant on vehicle platforms.
